1.	Literature review and current trends	Jorge Andrés Espinoza Aguirre Industrial Engineering, Faculty of Chemical Sciences University of Cuenca Cuenca, Ecuador 0000- 0001-5685-2681	February 2015	One of the most important retail industry trends is investment in Omnichannel retail strategies. Research shows that the average digital consumer owns 3.64 connected devices and tends to consult these devices prior to making a purchase.	Inadequate capital is always a big problem to their trade. No room for expansion due to lack of enough capital. Inability to enjoy economies of scale
2.	Research metholog	Cinthya Vanessa Muñoz Macas Industrial Engineering, Faculty of Chemical Sciences University of Cuenca Cuenca, Ecuador 0000- 0001-9820-0331	March 2017	Market research, in other words, is research about the world of your retail business. Among other essential details, it will provide you with data on your target shopper's buying power, shopping preferences, and relationship	<ul> <li>Marke ting resear ch (MR) is a costly affair.</li> <li>It is also length y and time-consu ming.</li> <li>It has a limite d scope.</li> </ul>

12.	IMPACT OF BIG DATA ON THE RETAIL INDUSTRY	A. Seetharaman	2011	The variables considered in this study are based on the current state of data analysis in the retail sector.	The final recommenda tion is to research and analyse the company's performance in terms of the financial and operating benefits that companies can achieve with data analysis.
13.	Inventory Manageme nt in Retail Store	Rohan Agawal	2015	It is difficult for the admin to record the inventory data quickly and safely because they only keep it in the logbook and not properly organized	The two factors that determine the appropriate order point are the delivery time stock which is the Inventory needed during the lead time
14.	Retailing Sector and Business Retailing Types	Kujtim Hameli	2009	The economic factors that most affect the demand for consumer goods are employme nt, wages, prices/inflatio n, interest rates, and consumer confidence.	The biggest problem with retail business is that profit margins of this business is fixed which ranges from 5 to 20 percent depending upon the brand of the product which retailer is selling and also unlike wholesaler who can expand business.

15.	PT.Abaisat Raya	Rahmayanti & Fauzan	2016	The total price required, and how much available space inventory in the warehouse	The financial and operating benefits that companies can achieve with data analysis.
16.	PT.ABC (Constructi on Company)	Candra	2019	To get the number of safety stock and to determine the maximum inventory.	Is subject to increased error, particularly when relational analysis.
17.	Ciputra	Budiharji & Hadikumiawati	2020	To get the number of forecast sales in the coming year.	Inability to enjoy economies of scale
18.	Amigo Group	Kartikasari &Suhartono	2013	Forecasting product sales in seven stores using the hierarchical time series forecasting method.	Order point are the delivery time stock which is the Inventory needed during the lead time
19.	Berkah Swalayan (SME Market)	Al-Husaini et al.	2018	Information system of business and forecasting on sales,low-cost purchases,and minimize inventory.	Thus, a conducive business environment would need to be further enhanced to foster innovative and creative SMEs that would become competitive amidst the challenges of the global market.

20.	an analysis of influencing factors	Nripendra P. Rana	2022	significant factors include past experiences, a variety of cognitive biases, an escalation of commitment and sunk outcomes, individual differences,	Influencing factors can be used as control variables to determine the key influencing factors of an object
